I. Basls of the opinion 1. With regard to the elements of the international application:* X					
the international application as originally filed. the description, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the claims, pages , as originally filed, pages , as amended under Article 19, pages , filed with the demand, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , filed with the demand pages , filed with the demand pages , received on with the letter of With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the					
the description, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the claims, pages , as originally filed, pages , as amended under Article 19, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , received on with the letter of With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the					
pages , filed with the demand, pages , received on with the letter of the claims, pages , as originally filed, pages , filed with the demand, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , received on with the letter of 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished for the purposes of international search (under Rule 23.1(b)). the language of a translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the					
pages , received on with the letter of the claims, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , received on with the letter of 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the					
pages , received on with the letter of the claims, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , received on with the letter of 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the					
pages , as amended under Article 19, pages , filed with the demand, pages , received on with the letter of the drawings, pages , as originally filed, pages , filed with the demand, pages , filed with the demand, pages , received on with the letter of the sequence listing part of the description: pages , as originally filed pages , filed with the demand pages , filed with the demand pages , received on with the letter of 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is: the language of a translation furnished for the purposes of international search (under Rule 23.1(b)). the language of publication of the international application (under Rule 48.3(b)). the language of the translation furnished for the purposes of international preliminary examination (under Rules 55.2 and/or 55.3). 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written opinion was drawn on the basis of the sequence listing: contained in the international application in printed form. filed together with the international application in computer readable form. furnished subsequently to this Authority in written form. furnished subsequently to this Authority in computer readable form. The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the

EP 1326290 A2 (XEROX CORPORATION) 9 July 2003—Abstract; figure 2

INVENTIVE STEP (IS) CLAIMS 1–53

While the cited documents do not specifically disclose electroplating of a thick copper layer, they do disclose bonding of a thick metal layer on the side other than the sapphire substrate, and the subsequent removal of the sapphire substrate. KUB states that "Any number of bonding techniques may be used". KNEISSL states that "The laser diode array may be attached to a thermally conductive wafer before or after substrate removal by soldering, thermo-compression bonding or other means". Electroplating would be an obvious method to a person skilled in the art. Consequently the claims do not involve an inventive step.

VIII. Certain observations on the international application

The following observations on the claims of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 1. The claims as a whole are not clear and do not relate to a single invention. Independent claims 1, 29, 38, 43, 48 and 50 are each characterised by their own set of technical features. It is therefore not clear which technical features define the scope of the monopoly sought. Each independent claim appears to include technical features that are missing from another independent claim. It is therefore not clear whether such features are essential to defining the invention.
- 2. The claims are not fully supported by the description. Each independent claim lacks one or more technical features that appear to be essential to defining the invention.
- 3. The description relates to sapphire substrates and electroplating of thick copper layer. These essential features do not appear in the independent claims.
